DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Specification

2. First paragraph of the application should include a cross-reference to related application. In particular, the copending Application No. 09/431849, should be cross-referenced.
3. It is noted that the reply filed on 8/15/2002 is not fully responsive to the prior Office Action, Paper No. 8, because Applicant failed to bring the copending Application 09/431849 to the Examiner's attention.

Claim Rejections - 35 USC § 112

4. The presumed claim 1 on page 6 of original Application lacks the claim number.

Double Patenting

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-20 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 2-9, 11 and 12 of copending Application No. 09/431849. Although the conflicting claims are not identical, they are not patentably distinct from each other because the pending claims 1-20 are virtually identical to the claims of copending Application No. 09/431849.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

More particularly, it is noted that claim 1 is de facto identical to claim 12 of copending Application No. 09/431849, i.e., the masking tape or strip comprised of: (a) a flexible sheet backing or support and a pressure sensitive or self-adhesive composition, (b) a masking is laminated in an edge region of the pressure sensitive adhesive composition and it is believed that masking paper is inherently capable of adhering and absorbing paint, and (c) a masking sheet is laminated onto the very same edge of the pressure sensitive adhesive composition. Additionally, all the dependent claims are essentially the same scope as those of the '849 Application.
